Survey (2/3)

Which part/section was most useful today?
(1/2)

0 0 9

- explanation of the concepts behind causal inference, and seeing the step by step code
- The complete workflow was very enlightening.
- The fundamental problem in causal inference
- matching
- I have used Propensity scores before, and attended other webinars, but every time I seem to learn something new or to clarify concepts that were not very

clear. This was a great presentation! It answered some questions I had and introduced me to some cool R packages I did not know, like cobalt.

- Difference between ATE and ATT. Also, the concept of weighting with the example.
- The presentation was engaging. The initial context to set the stage was incredibly helpful.
- Explanations of the various concepts and methods
- The illustration or matching
